

Webinar on

Sterilization of Pharmaceutical Products and Medical Devices

Date : August 24, 2021

Areas Covered

- Types of sterilization methods*
- Predominant uses of sterilization within the Medical Device and Pharmaceutical/Biotech industries*
- Product interactions with Various Modes of Sterilization*
- When to Use one Sterilization Method Over Another*
- Parametric Release – What is it?*

-
- *How to Use Parametric Methods*
- *Development of the Techniques – Issues and Answers*
- *Considerations of cost of sterilization*
- *Use of contract sterilization vs. in-house*
-

This webinar will go over the four methods of sterilization and why one method would be chosen over the other.

PRESENTED BY:

Carl Patterson is a seasoned Pharmaceutical Manufacturing, Aseptic Processing, and Quality Assurance Professional who is based in San Diego, California. As soon as he discovered the importance of biotechnology in the area, he was inspired to enter the pharmaceutical manufacturing industry. However, his avid interest in all things biology, microbiology, and biochemistry officially began when he served in the U.S.

Date : August 24, 2021

Time : 01 : 00 PM EST

Duration : 60 Minutes

Price: \$179

Webinar Description

Pharmaceutical products and medical devices are required to be sterile to be used in patients. Sterilization of these crucial products can be done in several ways depending on the characteristics of the product being sterilized. There are four typical ways a product can be sterilized. These are sterilization by Ethylene Oxide, Gamma irradiation, Steam and Pressure, and filtration. Knowing the characteristics of your product will determine what method will be used. This webinar will go over the four methods of sterilization and why one method would be chosen over the other.

Who Should Attend ?

This webinar will provide valuable assistance to the following personnel in pharmaceutical and medical device manufacturing companies:

- *Manufacturing companies*
- *Quality system auditors*
- *Microbiology analysts and technicians*
- *Consultants*
- *Regulatory and Compliance Management*
- *Quality Assurance personnel*

- *Quality Control personnel*
- *Research & Development*
- *Regulatory Affairs Professionals*
- *Validation*
- *Auditing Professionals*
- *Microbiology Professionals*
- *Auditors*
