Webinar Description

Employee conflict costs organizations money, morale, and productivity. A rise in absenteeism and turnover is a likely sign that an organization is suffering from unresolved conflict. In this webinar, you will learn how to handle conflicts caused by the tasks of the job and relationships with coworkers. You will learn how to evaluate the seriousness of the conflict and how to appropriately intervene. In addition, the role of emotional intelligence, confronting employees in conflict and dealing with common issues of conflict at all levels of the organization will be considered.

Clashing co-workers can reduce morale and productivity of an organization or team. In addition, employee conflict often results in a turnover and a waste of a manager's time. While conflict is not necessarily bad, it still must be handled in a way that contributes to organizational performance.

Who Should Attend ?

Supervisors, Team Leaders, Business Owners and Managers, Presidents and Vice Presidents of organizations, Human Resource Managers and others with management responsibilities, and administrative assistants.
