

Webinar on

# BEST SELLER - Excel' Savvy: Intermediate Pivot Tables

# **Learning Objectives**

- Identify how to quickly transform lists of raw data into usable reports in just a few simple steps
- Apply the PowerPivot feature and the Recommended PivotTables feature
- Recall how to compare calculation methods within pivot tables

### **Areas Covered**

Adding a percentage column to a pivot table with just a couple of mouse actions

Adding interactivity to pivot tables by using the Slicer feature for filtering in Excel 2010 and later

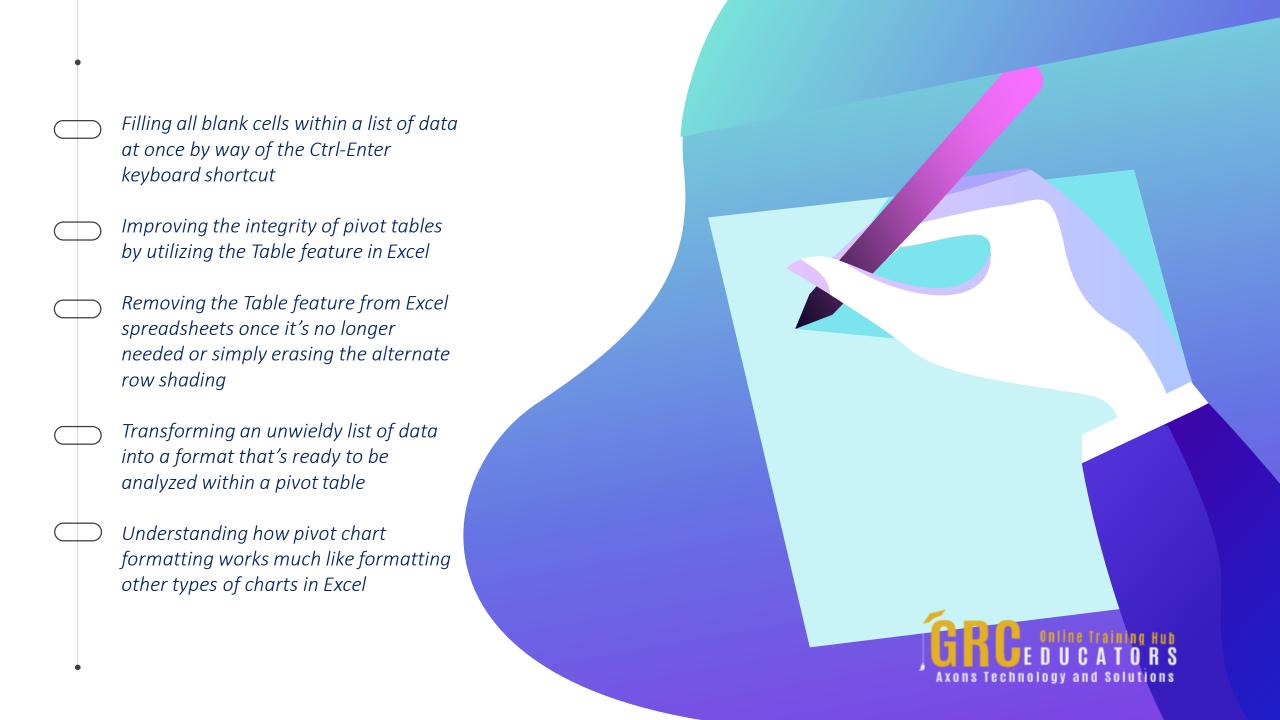

Building a pivot table report from a list of data

Controlling information overload within pivot charts by filtering

Developing calculated fields that perform math on data within the source data

Drilling down into the details behind any amount within a pivot table with just a double-click

In this Webinar you'll know how to create selfupdating titles for charts and pivot charts, expand and collapse pivot table elements, drill down into numbers with a simple doubleclick, and more.

#### **PRESENTED BY:**

Nationally recognized Microsoft Excel expert David H. Ringstrom, CPA, is the president and owner of Accounting Advisors, Inc. based in Atlanta, Georgia. David founded Accounting Advisors in 1991 as a consulting-services business, later he began teaching continuing education classes as well. His mission since is to offer quality training and consulting services on Microsoft Excel via live webcasts, on-demand self-study webcasts, and in-house engagements.

**Best Seller** 

Duration: 90 Minutes

Price: \$150

## **Webinar Description**

Excel expert David Ringstrom, CPA, takes you step-by-step beyond the basics of pivot tables in this comprehensive presentation. He explains the PivotTable feature, the PowerPivot feature, the Recommended PivotTables feature, and others. After participating in David's presentation, you'll know how to create self-updating titles for charts and pivot charts, expand and collapse pivot table elements, drill down into numbers with a simple double-click, and more.

David demonstrates every technique at least twice: first, on a PowerPoint slide with numbered steps, and second, in Excel 2016. He draws your attention to any differences in Excel 2013, 2010, or 2007 during the presentation as well as in his detailed handouts. David also provides an Excel workbook that includes most of the examples he uses during the webcast.

### **Who Should Attend?**

Practitioners who can benefit from learning how to manipulate their pivot table data faster and more efficiently.
