# **3 Webinars To Give Clear Knowledge About OSHA's Fall Protection In General Industry, Mock And OSHA Audit**

# Webinar Description

Attending this bundled webinar will give you a clear understanding of your responsibility for Fall Protection, How to prepare and conduct Mock OSHA Audit and toolbox safety talks that don't bore you death.

The webinar format is 1-1.5 hours of audio-visual presentation, including a brief Q&A session.

This webinar bundle includes below 3 recorded webinars:

**Fall Protection in General Industry**

**Toolbox Safety Talks that Don't Bore you Death: Find Great Content and Make them Engaging!**

**How to prepare for an OSHA Audit**

# Fall Protection in General Industry

Presented by Sheldon Primus

This webinar with expert speaker Sheldon Primus, MPA, COSS will focus on the hazard of fall protection and the various ways to protect the workers. Additionally, you will learn the regulations that can affect them currently and in the future as they relate to falling protection in GI.

Fall protection in General Industry (GI) has long been a source of confusion within the OSHA regulations. Unlike their Construction and Maritime counterparts, the GI employer does not have a dedicated fall protection subpart or comprehensive rules. Though it is widely understood that fall protection starts at 4 feet for GI, there are still some ambiguous situations where there are no recognized worker protection standards.

# Toolbox Safety Talks that Don't Bore you Death: Find Great Content and Make them Engaging!

Presented by Steven ST Laurent

If you find it difficult to lead a meaningful safety meeting, then this talk is for you! Too often I've heard people tell me that they've never gotten any guidance on how to prepare, find good content, and take a list of steps, a statistic or procedure and turn it into an engaging talk. And sadly, in some cases, the Toolbox Talk or Safety Huddle devolves to just passing around a piece of paper and saying, "This is the talk for the week. Sign it." AHHHHHHHHH. This can't be! And it won't be any more after attending this relevant webinar that will give you practical tips for immediate use!

Do your Toolbox Safety Talks engage your audience, provoke great discussion all while compelling people to take action on safety and health in their personal and professional lives? The soft-skills or people skills of presenting, public speaking and a powerful delivery have fallen by the wayside. This Webinar resurrects these skills in a fun and easy-to-apply manner.

# How to prepare for an OSHA Audit

Presented by Garry Happner

Based on my 47 years experience, I will share the top 10 items that most employers overlook in their safety program that could lead to an expensive citation from OSHA. Also, guidelines to follow that will assist with compliance with the least amount of frustration.
