# How to Apply ISO 27001 Principles to Enterprise Risk Management In 2018

Presented by Dr. Michael C. Redmond

ISO 27001 describes how to manage information security in a company. According to its documentation, ISO 27001 was developed to "provide a model for establishing, implementing, operating, monitoring, reviewing, maintaining and improving an information security management system." By applying ISO 27001 standards effectively in your organization you can ensure a robust security for your organization's vital information assets.

Protecting your organization's information is critical for the successful management and smooth operation of your organization. Utilizing ISO/IEC 27001 information security management systems aid your organization in managing and protecting your valuable data and information assets. ISO 27001 not only helps to keep your confidential information secure but also provides customers and stakeholders with a confidence in your risk management system while ensuring you are meeting legal obligations.

# GDPR, Are You Ready?

Presented by Mack Jackson Jr

What is the regulation called GDPR? Is your business ready for the change? How do these new laws affect your business? What is sensitive data? These are some of the questions that this webinar called "GDPR, are you ready?" Can answer.

This webinar is a comprehensive discussion on the General Data Protection Regulation from the EU. The General Data Protection Regulation (GDPR) which is designed to enable individuals to better control their personal data. The GDPR was ratified in mid-2016 and immediately became law. Member states now have a 2 year implementation period. Enforcement will commence by 25th May 2018 at the latest.
