

Webinar on

Set Of 3 webinars On Project Management

Webinar Description

The webinar format is 1-1.5 hours of audio-visual presentation, including a brief Q&A session.

This webinar bundle includes below 3 recorded webinars:

Project Management For Non-Project Managers

PM Skills for BAs-Planning, Estimating, and Controlling BA Work

Unlimited PTO – Financial, Emotional And Practical Considerations For Implementation

Project Management For Non-Project Managers

Presented by Rebecca Staton-Reinstein

Today, much work in organizations is organized as a project although it may not be called a project. Often, through years of downsizing, people with in-depth special knowledge in critical areas are no longer available. The work still needs to be performed when needed, so someone is assigned. Thinking about these special, periodic assignments as projects and applying the approaches of project management helps the person in charge systematically organize work, people, and stakeholders to get the job done successfully. Anyone can use the basic tools of project management to make their work more efficient and effective.

PM Skills for BAs-Planning, Estimating, and Controlling BA Work

Presented by Robin F. Goldsmith

Is poor project management impacting your effectiveness? What can you do about it? How's that working out? Historically, Business Analysts (BAs) and Project Managers (PMs) focus on and are trained in separate skill sets. BAs focus on requirements definition, whereas PMs concentrate on budgets, schedules, resources, and tasks. Having both PM and BA present on a project presumably enables covering all bases with more efficient specialized division of labor, and sometimes each is explicitly precluded from the other's turf.

Unlimited PTO – Financial, Emotional And Practical Considerations For Implementation

Presented by Laura Earley

Unlimited PTO – Considerations for Implementation – will walk you through everything you need to consider prior to implementing “unlimited” time off to your employees. The goal of this presentation is not to convince you it’s the “right” thing to do, because this type of time-off program is not for everyone. Indeed, you may walk away with the sound belief that your current vacation policy is just right for your organization.

Instead, this program is designed to help you understand everything that you’ll need to think about prior to communicating and implementing this type of program for your workforce. You’ll understand the financial implications, compliance with other state and local leave laws, coordination with Short-Term and Long-Term Disability benefits, as well as system requirements to transition from your current program to an Unlimited PTO program. Join us to learn if this type of program is right for your organization.
