# **2 Webinar Guide To Work More Efficiently In Excel Formulas**

# Webinar Description

This bundle courses explained about how to use the Data Table feature in Excel to compare calculation results based on varying inputs and alternatives to the VLOOKUP function and learning how to replace an existing custom view with new settings.

The webinar format is 1-1.5 hours of audio-visual presentation, including a brief Q&A session.

This webinar bundle includes below 3 recorded webinars:

**Excel Savvy: Implementing the Custom Views Feature**

**Excel Savvy: Mastering Advanced Lookup Functions**

# Excel Savvy: Implementing the Custom Views Feature

Presented by David H. Ringstrom

In this presentation, Excel expert David Ringstrom, CPA, shares a variety of ways you can automate your work in Excel by way of the Custom Views feature—one of Excel’s most overlooked features. Step-by-step, David demonstrates how Custom Views allows you to hide and unhide multiple worksheets at once, set a print range for multiple areas of a worksheet, make a single set of data serve multiple purposes, gain control over long lists of data by filtering vs. sorting, and much more. You’ll be empowered to use Excel far more effectively after attending this webcast.

# Excel Savvy: Mastering Advanced Lookup Functions

Presented by David H. Ringstrom

In this insightful webcast, Excel expert David Ringstrom, CPA, focuses on alternatives to the VLOOKUP function. While many Excel users rely on VLOOKUP for basic lookup functionality, it's often because they're unaware of other functions that can enable them to work more efficiently in Excel. David sheds light on what can go awry with VLOOKUP; explains how to future-proof VLOOKUP; and discusses alternative functions, including IFNA, MATCH, SUMIF, SUMIFS, IFERROR, CHOOSE, and OFFSET.
