

Webinar on

Biosafety and Blood-borne Pathogen Safety in the Lab

Date : July 01, 2021

Areas Covered

This webinar will review the regulations and guidelines recommended by the Centers for Disease Control and Prevention (CDC) for work with biological materials and, specifically, with bloodborne pathogens.

- Principles of biosafety and bloodborne pathogens*
- Risk groups for biological Materials*
- Biosafety containment levels for work with biological materials*

-
- Engineering controls and key differences between a biosafety cabinet and a chemical fume hood*
- Universal precautions to prevent infection*
- Personal protective equipment and clothing*
- Sharps management*
- Signage and labeling*
- Waste and spill management*
-

This webinar will review how best to approach biosafety and implement an effective management program for blood-borne infections, safety and health.

PRESENTED BY:

Danielle DeLucy, MS, is the owner of ASA Training and Consulting, LLC which provides Pharmaceutical and Biologics based companies with training and quality systems assistance in order to meet regulatory compliance. Prior to this role, Danielle has been in the industry for 15 years serving in numerous Quality Management Roles, such as the Director of Product Quality.

Date : July 01, 2021

Time : 01 : 00 PM EST

Duration : 60 Minutes

Price: \$179

Webinar Description

This webinar will review how best to approach biosafety and implement an effective management program for blood-borne infections, safety and health, laboratory safety, infectious material, and blood infection. If you work in a laboratory exposed to viruses or bacteria that are biological hazards and are searching for a better way to manage your Biosafety program, this webinar will help give you the framework to set up a successful management policy.

Who Should Attend ?

- *EHS Staff*
- *Occupational Health Staff*
- *Laboratory Staff*
- *Team Leads*
- *Supervisors*
- *Managers*
- *Business Owners*
