Date : July 19, 2021

Time : 01: 00 PM EST

Duration : 60 Minutes

Price: \$179

Webinar Description

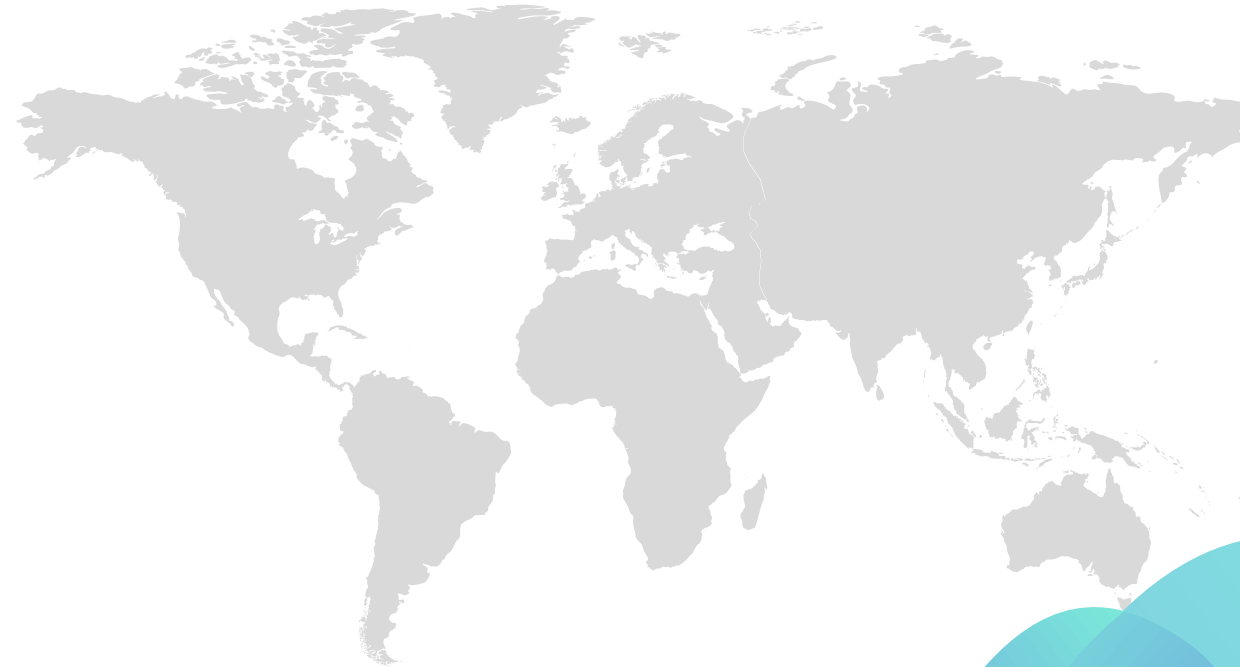

The extreme criticality of GMP audits and the potential consequences, many pharmaceutical manufacturers have adopted a program of internal and external GMP audits in order to find and correct areas where sites are not in full compliance with the GMP regulations before an FDA audit occurs. By providing proper tools and techniques to be used during a GMP audit. The auditor can begin to understand the areas where improvements are needed.

This webinar will provide you with the knowledge, understanding, skills, and confidence to audit all aspects of pharmaceutical manufacture and control, whilst retaining the cooperation and respect of the other personnel.
