

Webinar on

Compliance with the OSHA Blood borne Pathogens Standard in Healthcare Settings

. Learning Objectives

- A brief history of the OSHA Blood borne Pathogens Standard*
- Exposure Control Plan*
- Engineering Controls (sharps injury prevention devices)*
- Work Practice Controls*
- Training, Education, and Competency*
- Recordkeeping, Reporting*
- HBV Vaccination*
- Waste & Disposal*
- Signage*
- Current injury and exposure data (EPINet)*

This session will be delivered by a former OSHA National Blood borne Pathogens Coordinator and will give you first-hand experience regarding some of the mistakes that healthcare facilities make that result in citations and fines.

PRESENTED BY:

Dr. Mitchell is the International Safety Center's President and Executive Director. The Center distributes the Exposure Prevention Information Network (EPINet®) to hospitals to measure occupational exposures to sharps injuries and other blood and body fluid exposures.

On-Demand Webinar

Duration : 60 Minutes

Price: \$200

Webinar Description

Healthcare facilities struggle with compliance for the OSHA Blood borne Pathogens Standard, especially with the newer requirements from the Needle stick Safety and Prevention Act. This session will be delivered by a former OSHA National Blood borne Pathogens Coordinator and will give you first-hand experience regarding some of the mistakes that healthcare facilities make that result in citations and fines. It will provide essential components for compliance and give attendees excellent resources to assist with compliance and ultimately to help protect healthcare personnel from exposure to blood and body fluids.

Who Should Attend ?

Employee health
Occupational health
Risk management
Infection prevention and control
Infectious disease
HIV coordinator
Environmental services
Sterile processing personnel
Materials management
Environmental health and safety
Bio safety
Nursing
Surgical services
