Amateur Radio's primary purpose for existing is to provide backup communications in times of disaster.

**PRESENTED BY:**

*Dr. Michael Abitz received his Doctorate in Management from Colorado Technical University and Master of Science in Quality Assurance from California State University.*

On-Demand Webinar

Duration : 60 Minutes

Price: \$200

# Webinar Description

The Webinar will center around: Introduction to Centers for Medicare & Medicaid Service regulations (CMS.gov), vulnerabilities facing medical facilities, businesses, and emergency communications provided by Amateur Radio.

Amateur Radio's primary purpose for existing is to provide backup communications in times of disaster. The webinar presents methods used to provide communications when Internet and Phone Systems are not accessible due to human-made or natural disasters.

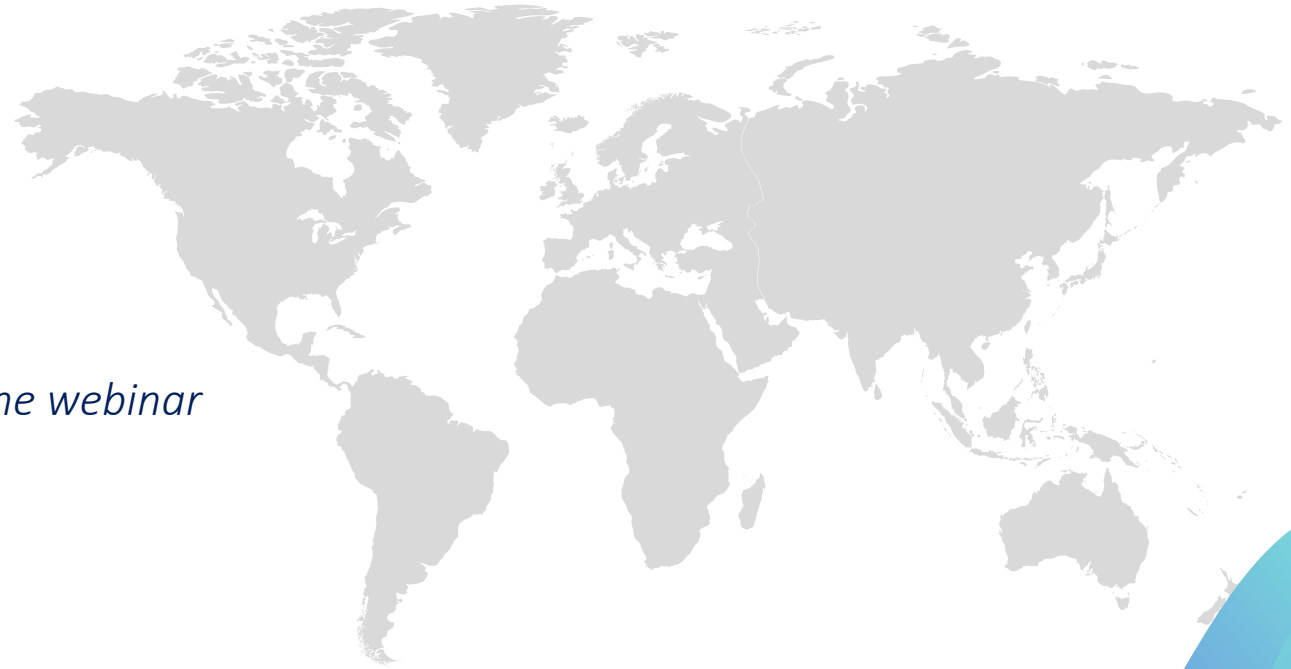

# Who Should Attend ?

*Hospital CEOs*

*Doctors*

*All medical facility staff*

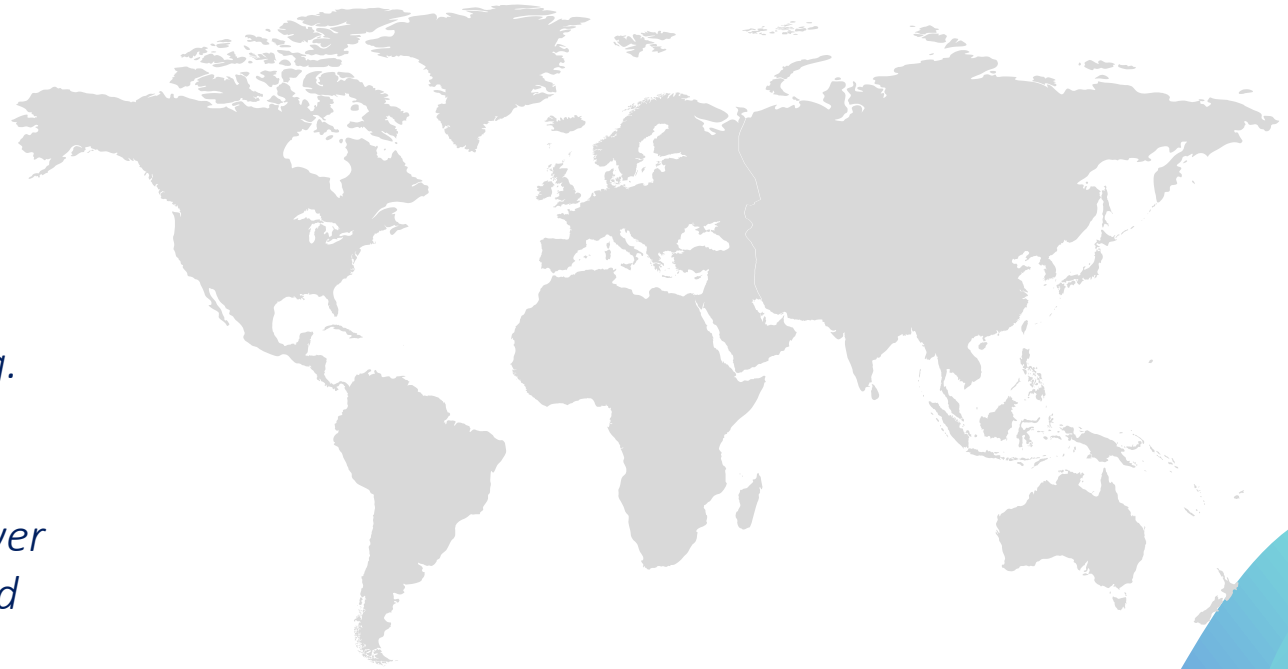

*Patients and families of patients will benefit from the webinar*

# Why Should Attend ?

*Communications infrastructure vulnerability to disasters in the United States (U.S.) is significant; medical facilities accepting Medicare or Medicaid patients are required to have a backup communications system, or they may lose funding.*

*Voice and digital communications within and between facilities is not the only risk; the U.S. Power Grid Infrastructure is an easy target: facilities need to have a backup power source.*
