His professional accreditations include Certified Management Consultant (CMC), Certified International Trade Professional (CITP) and FITP (FITT International Business Professional).

On-Demand Webinar

Duration : 100 Minutes

Price: \$200

Webinar Description

This course provides a concise overview of Google Sheets, a cloud-based spreadsheet application by Google. Similar to Excel, the tool allows users to enter numbers, apply formulas, prepare graphs, create charts, use pivot tables and more. While Excel is the default tool and industry standard for most accountants, Sheets has many underrated capabilities which are clearly superior to Excel. These include online collaboration, team communications, mobility, version control, revision history, cloud storage, translation, Google integration, and scores of third-party add-ons. You'll walk away knowing how to use a whole new array of spreadsheet features not found in Excel that can boost your analytical powers and accelerate your financial workflow.

Who Should Attend ?

Practitioners who want to explore Sheets as an Excel alternative or complementary tool rich in collaboration, mobile and knowledge features.

Topic Background

Sheets apps for web, mobile and offline

Excel compatibility

How to create, edit, and format

Work with sheets, rows, and columns
