Ginette Collazo, Ph. D. is an Industrial-Organizational Psychologist with 20 years of experience that specializes in Engineering Psychology and Human Reliability, disciplines that study the interaction between human behavior and productivity. She has held positions leading training and human reliability programs in the Pharmaceutical and Medical Device Manufacturing Industry.

On-Demand Webinar

Duration : 90 Minutes

Price: \$200

Webinar Description

Human error is known to be the primary cause of quality and production losses in many industries. Although it is unlikely that human error will ever be eliminated, many human performance problems can be prevented. One method to improve productivity and reduce human error is the “5S Method”. This webinar is intended to provide you with practical knowledge on how to keep your workplace cleaner, safer, simpler and organized, helping you to achieve the intended goals and successfully execute assigned activities.

Who Should Attend ?

Training managers and coordinators

Operations

Manufacturing

Plant engineering

QA/QC staff

Process excellence/improvement professionals

Industrial/process engineers

Compliance officers

Regulatory/legislative affairs professionals

General/corporate counsel

Why Should You Attend ?

This webinar would provide tools that can be implemented and used after this event. These include practical tools and recommendations. It presents an overview of the five pillars of 5S: Organization (Sort), Orderliness (Set in Order), Cleanliness (Shine), Standardization (Standardize), Discipline (Sustain). The contents of this course are based on Hiroyuki Hirano's, 5 Pillars of the visual workplace.
