Webinar on

Are You Ready for FDA FSMA Preventive Controls Audit?

Learning Objectives

- *Expectations covered for new requirements for FSMA Audit by Regulators*
- *New Hazard Analysis Risk Preventative Controls (HARPC) or Food Safety Plan basics introduced*
- *Supply chain Preventative Controls outlined*
- *Legal Authority of FDA detailed, including watch-outs*
- *Importance of documentation requirements described*
- *Employee preparation and training essentials explained*
  - *o Closing a Successful Audit, including managing #483's and confidentiality, Supply chain Preventative Controls*

On-Demand Webinar

Duration : 60 Minutes

Price: $200

Webinar Description

Human error is known to be the primary cause of quality and production losses in many industries. Although it is unlikely that human error will ever be eliminated, many human performance problems can be prevented. Human errors start at the design stage. From procedures, training, and workplace environment many variables that affect human behavior CAN be manipulated reducing the likelihood of these occurrences. To work with these challenges, it is essential to understand human behavior and the psychology of error as well as understand exactly where the weaknesses of the system are so that they can be improved and/or fixed. This course offers practical approaches and models to address human performance issues in GMP related environments by using a particular methodology to correct, prevent and avoid reoccurrence of these matters.

Who Should Attend ?

Quality Control/Assurance and Food Safety professionals
Supervisors
Leads
Managers
Operations managers/supervisors
Sanitation managers
Supervisors or leads
Corporate quality managers
Operations personnel
Senior management
Plant management personnel
Third parties developing HACCP plans
Auditors and those with food safety inspection roles
Validation specialists
Consultants
Quality system auditors
PCQI's

Why Should Attend ?

FDA implemented the new Food Safety Modernization Act (FSMA), including the hazard analysis and risk-based preventive in 2016 to help the industry manage potential hazards in producing safe food products. FSMA places primary responsibility on the owners and operators of food facilities to identify and control hazard risks, and intentionally grants facilities considerable flexibility in designing and implementing their food safety plans. In light of these new regulations, FDA introduced an enhanced audit approach to ensure food processors have adequately eliminated these potential risks in their food facilities. This course will examine new FDA authority, introduces examples of Preventative Controls, leading into minimal recommended preparation steps for handling the new FDA FSMA requirements, including managing Form #483 for non-compliances.
