Formerly he was the Executive Director of the Navigant Construction Forum™

On-Demand Webinar

Duration : 90 Minutes

Price: \$200

Webinar Description

Mediation is not new. Mediation was employed in ancient India as well as in the Islamic world. In more recent times mediation has been widely adopted in the U.S. construction industry as a form of Alternative Dispute Resolution (ADR). Mediation is often employed when construction claims negotiations fail to reach a resolution in lieu of arbitration or litigation. The webinar discusses mediation as a process and discusses why construction professionals need to learn about mediation. The webinar identifies both good and bad points concerning mediation. Additionally, the webinar offers a number of practical suggestions on how to prepare for and be successful in mediation “success” is defined as reaching a resolution of a construction claim without going to arbitration or litigation.

Mediation is often a step between failed negotiations and arbitration or litigation. It is a voluntary, consensual process aided by the services of an external neutral mediator. This webinar explores the ins and outs of mediating a construction dispute.
