As an expert in this field, he has been invited to speak at many international conferences, corporate events, and webinars. Jim has written numerous articles for international publication.

On-Demand Webinar

Duration : 60 Minutes

Price: \$149

Webinar Description

This webinar will introduce you to this regulation in layman's language and provide an understanding of its current intent and purpose. You will learn why this is an important regulation. We will then briefly discuss what is needed to demonstrate that your product has followed the regulation.

Product Substance Compliance is a concept that is difficult for many in the USA to understand since that is so few regulations on the chemicals used in products. Proposition 65 requires an understanding of the substances used in the product, like EU RoHS and EU REACH.

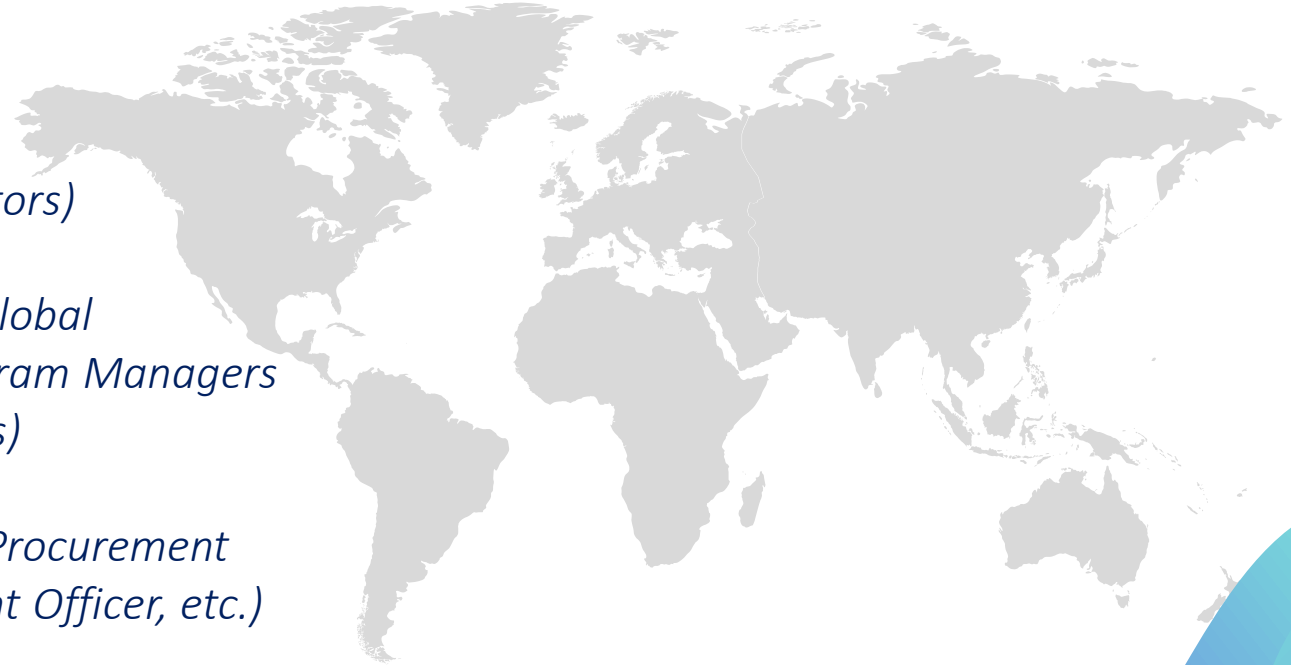

Who Should Attend ?

*Compliance (Chief Compliance Officer,
Compliance Managers, EHS Compliance Directors)*

*Product & Materials Compliance (Program / Global
Manager, RoHS, REACH, Conflict Mineral Program Managers
& Directors, Certification Compliance Directors)*

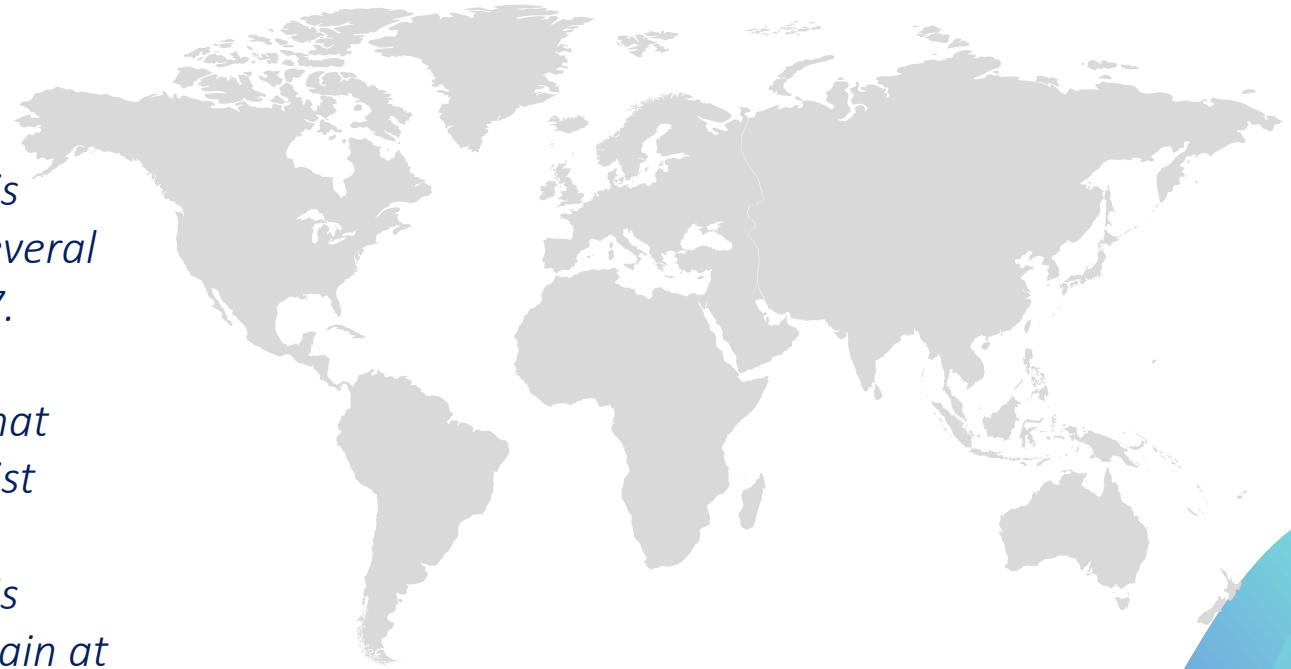

*Procurement (Procurement Officer, Manager Procurement
Vice President Procurement, Chief Procurement Officer, etc.)*

Strategic & Global Sourcing Manager

Why Should Attend ?

This webinar will provide you with a basic understanding of California Proposition 65. This proposition has been changed and modified several times since its original implementation in 1987. Today the chemical list has grown to include approximately 800 compounds for every use that could be imagined. The breadth of this chemical list and the need to determine Maximum Daily Exposure Levels makes it very complicated. It is highly unlikely that your product does not contain at least one of the listed chemicals and is not get shipped into California. Therefore, California Proposition 65 should be important to all USA Product Manufactures.
