On-Demand Webinar

Duration : 60 Minutes

Price: \$200

Webinar Description

Non-tariff measures (barriers) are generally defined as policy measures other than ordinary customs tariffs that can potentially have an economic effect on international trade in goods, changing quantities traded, or prices or both (UNCTAD).

Who Should Attend ?

Exporters , Importers

Freight forwarders , Customer brokers

Transportation risk management officer

Small and medium-sized manufacturers, who are seeking to export their products

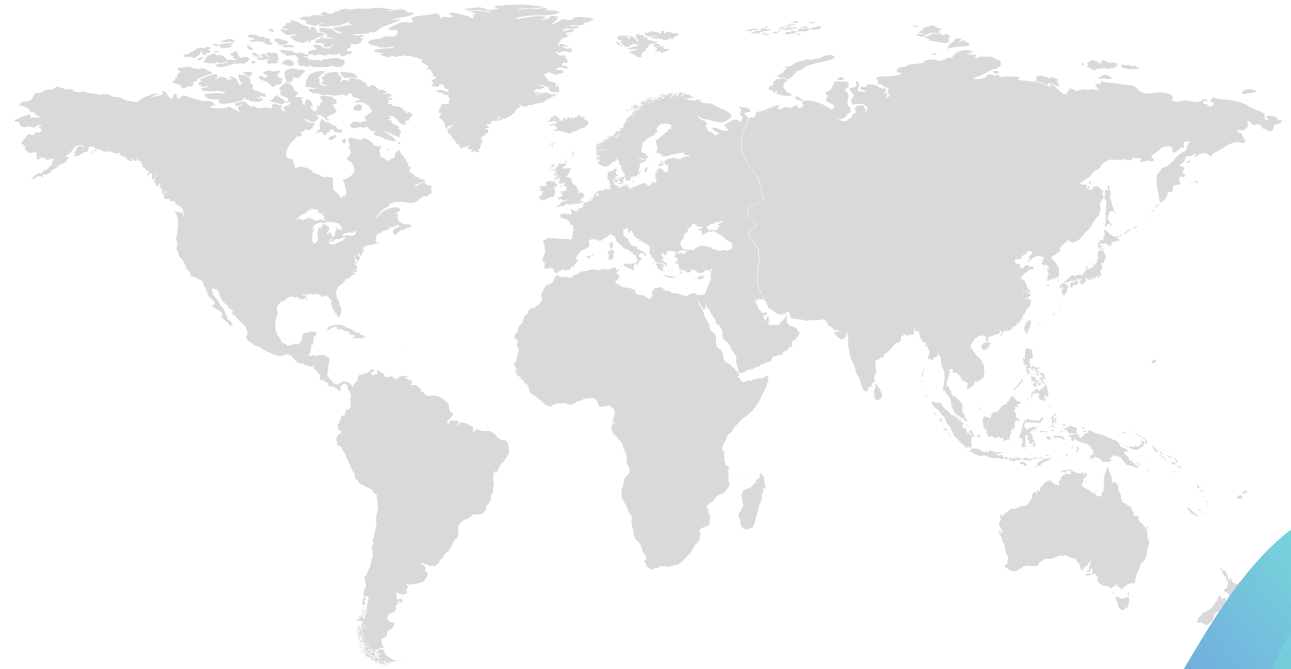

Global trade professionals

Trade compliance personnel

Why Should Attend ?

Non-tariff barriers (NTBs) refer to restrictions that result from prohibitions, conditions, or specific market requirements that make importation or exportation of products difficult and/or costly. In this course, attendees will learn the kinds of barriers established by the Mexican government and how to comply with them. The course will also discuss NTB's impact on the import/export process.
