

Webinar on

The New Hazardous Waste General Standards

This training will summarize new requirements, address in which states the requirements are currently effective and review the other requirements for hazardous waste generators.

PRESENTED BY:

Paul Nazaryk is an environmental consultant and attorney experienced in environmental compliance, permitting, and regulatory affairs. While working in the public sector for the Colorado Department of Public Health & Environment (CDPHE), he conducted 100s of hazardous waste inspections and handled dozens of cases. He is licensed as an attorney in Colorado, Montana and New Mexico.

On-Demand Webinar

Duration : 90 Minutes

Price: \$200

Webinar Description

The hazardous waste rules including the generator standards have been in existence since 1980. In 2016, EPA recently revised the standards with the intent of simplifying the generator rules. This training will summarize new requirements, address in which states the requirements are currently effective and review the other requirements for hazardous waste generators.

Background

Hazardous Waste Identification

Characteristic and Listed Hazardous Wastes

Used Oil and Universal Waste
