

Webinar on

Construction Cost Estimating Using RS Means Database And Online Estimating

Areas Covered

- A quick review of construction cost estimating concepts*
- Coverage of the RS Means Building Construction Cost Database (BCCD)*
- Item estimating, direct and total cost, using the print book*
- The RS Means online estimating system*
- Item estimating using RS Means online estimating*
- Estimating adjustments*
- Examples of assembly estimating*
- Examples of model estimating*
- General tips on using RS Means online estimating*

This seminar will briefly go over the estimating process and then cover the RS Means Building Construction Cost Database (BCCD) and how it is being used with the RSMMeans online estimating.

PRESENTED BY:

*Saleh Mubarak, Ph.D. in civil engineering from Clemson University, USA, specialized in Construction Project Management
Extensive experience in continuing education and professional training around the world. Topics are mainly planning & scheduling cost estimating, project controls. Topics also include soft skills and their integration with project management*

Duration : 90 Minutes

Price: \$200

Webinar Description

Construction cost estimating is the single most important task in the construction industry. In fact, it is the foundation of many other most other project construction management functions. This seminar will briefly go over the estimating process and then cover the RS Means Building Construction Cost Database (BCCD) and how it is being used with the RSMeans online estimating. The seminar will cover the item, assembly, and model estimating. It includes adjustments needed for location and other factors. It also goes over some overhead costs such as bonds, insurance, and fees. There will be illustrative examples.

Who Should Attend ?

Architects

Engineers (of all disciplines)

Contractors

Subcontractors

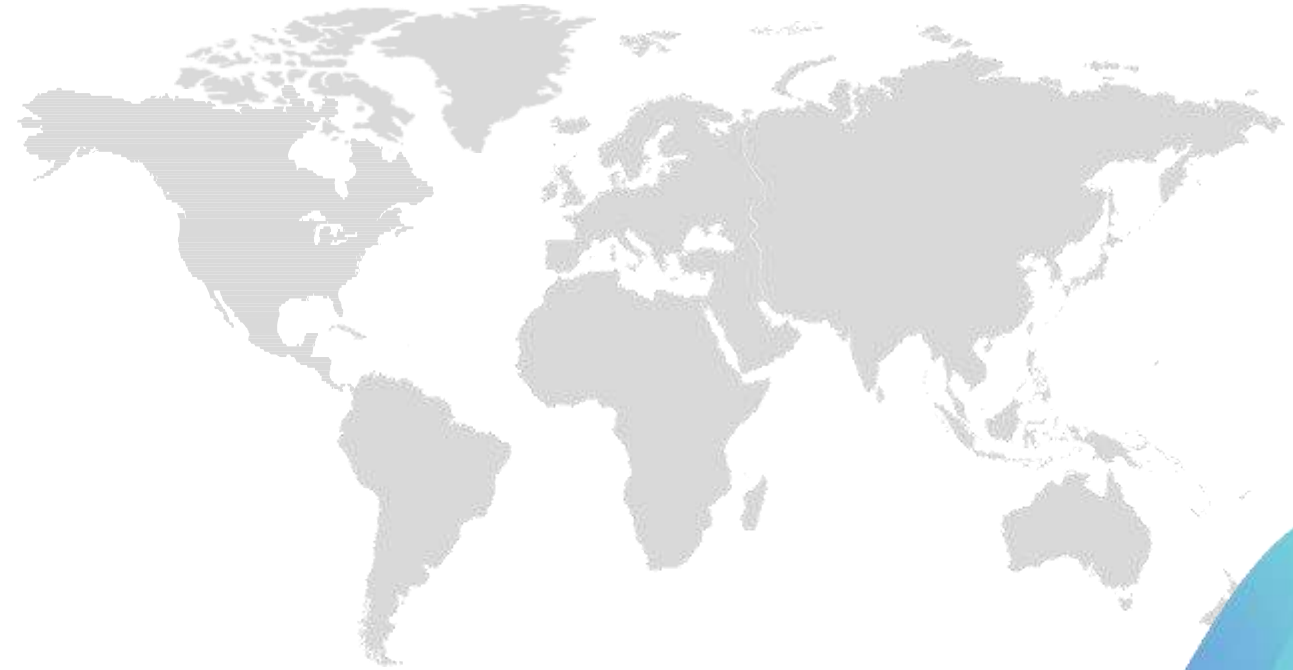

Project Managers

Cost Estimators

Schedulers

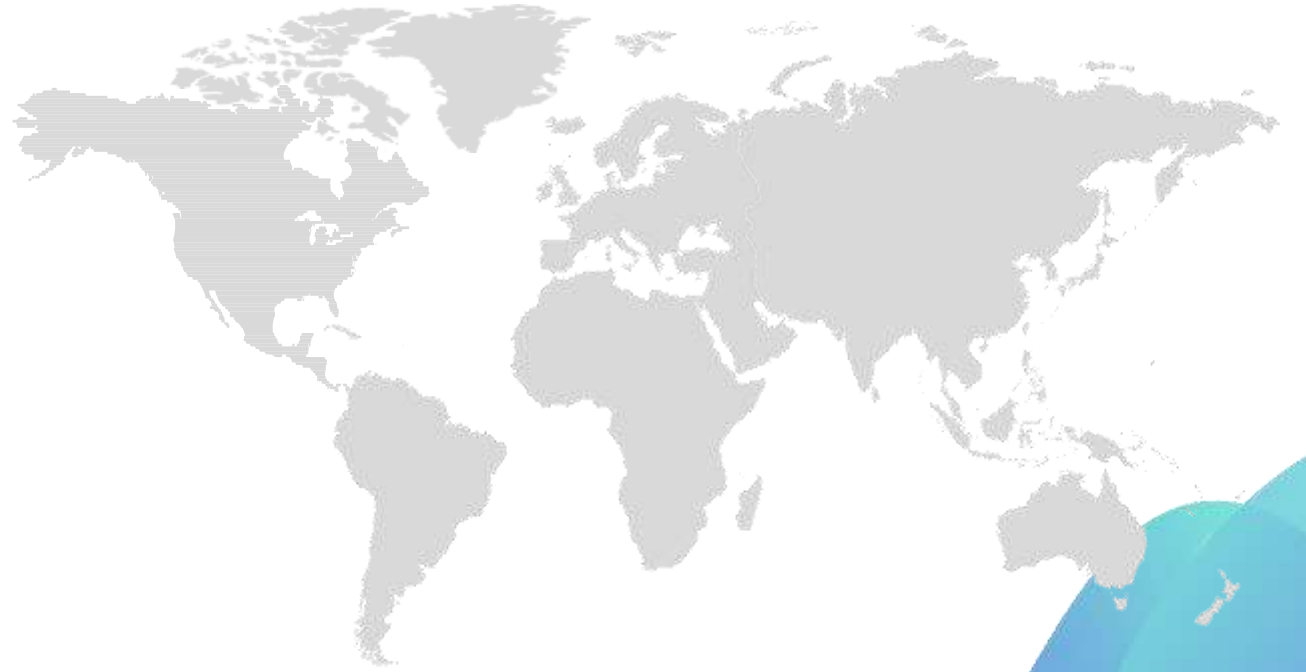

Project Management Team Members

Owners, Attorneys/Lawyers

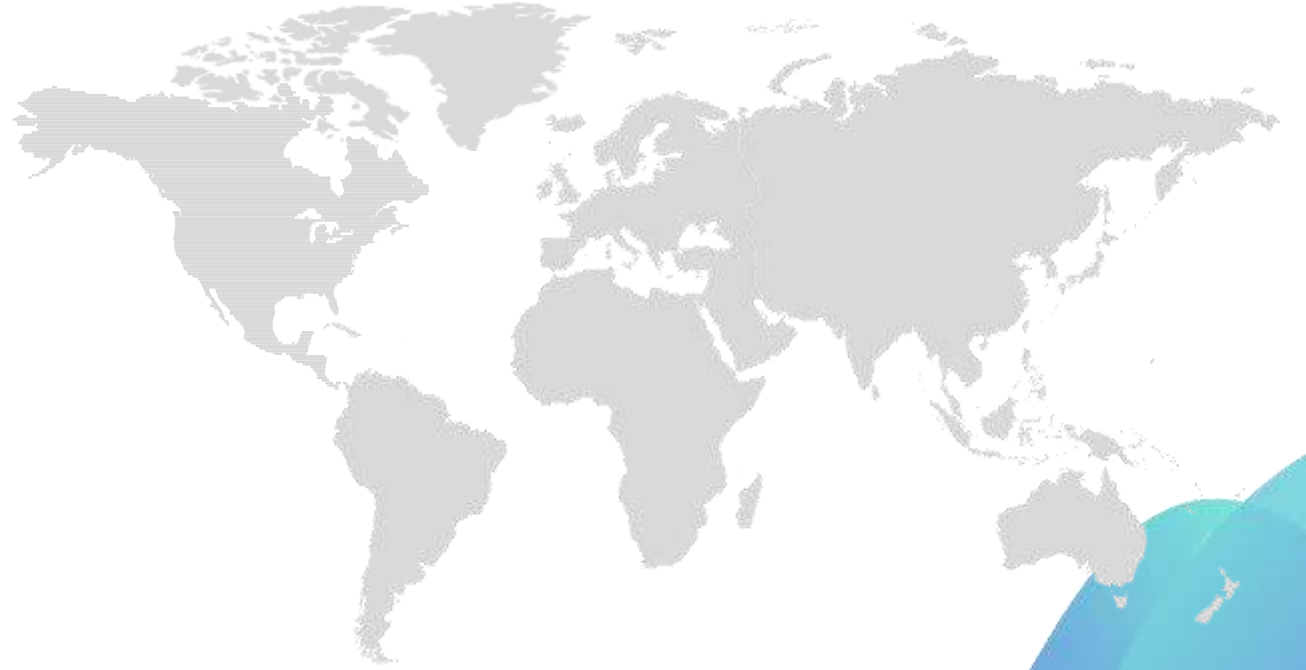

Why Should You Attend ?

This webinar offers great benefits to construction and construction management professionals as it offers highlights of the cost estimating using the RS Means database and online system. The seminar includes valuable tips for everyone involved in the building construction industry: owners, designers (architects and engineers), contractors, subcontractors, and the entire construction project management team.

Topic Background

Cost estimating is probably the most important task in construction. Methods and tools for quantity and cost estimating have gone a long way in the past few decades. The RS Means company has been publishing construction databases for decades. It has also created several costs estimating software programs; for items, assemblies, and models. This seminar sheds some light on the RS Means Building Construction Cost Database (BCCD) along with RSMeans online estimating.
