

Webinar on

Demystify Excel and Harness the Power Within

Learning Objectives

- Creating simple math formulas*
- The Mathematical Order of Operations*
- Auto sum*
- Relative Formulas*
- Absolute references*
- Linking formulas from one sheet to another*
 - Built in functions :*
 - o If*
 - o Sum*
 - o Count*
 - o Average*
 - o Sumif*
 - o Countif*
 - o Average*
 - o Vlookup*
 - o Date*

Microsoft Excel is a very powerful program. It can do many things. But it is so important to understand how to use the formulas and functions that Excel has. This webinar will show you how to build and manage formulas and functions in Excel.

PRESENTED BY:

Tom Fragale is a computer professional with over 30 years of professional experience. He has trained over 30,000 business people in on-line webinars, public seminars, and on-site training. His clients include many Fortune 500 companies, government agencies, military bases, and companies large and small across many industries, including manufacturing, banking, pharmaceutical, education, retail, etc.

On-Demand Webinar

Duration : 60 Minutes

Price: \$200

Webinar Description

Excel spreadsheets have really become essential in the workplace. They are used for many purposes, from budgets to forecasts, from financial spreadsheets, to even more scientific purposes and everything in between. But, all spreadsheets require formulas and functions. Formulas are mathematical equations in Excel, and functions are built-in formulas. Building formulas is a crucial skill in Excel, one that has to be mastered. In this webinar, you will learn how to create formulas from the data, This skill will put you heads and shoulders above everyone else who does have this skill, making you and an even more valuable part of your team. Imagine being able to make your own powerful spreadsheets that automatically show the results you want because of the powerful formulas you have created, instead of having to rely on someone else to make the formulas work for you. You can be more productive, make your team or department shine with great looking spreadsheets, and you can save time as well.

Microsoft Excel is a very powerful program. It can do many things. But it is so important to understand how to use the formulas and functions that Excel has. This webinar will show you how to build and manage formulas and functions in Excel.

Who Should Attend ?

Business owners

CEO's / CFO's / CTO's

Managers of all levels

Anybody who uses Excel on a regular basis, and want to be more efficient and productive

Administrators

Salespeople

Trainers

Bankers
