On-demand Webinar

Duration : 60 Minutes

Price: \$200

# Webinar Description

How could one assess the effectiveness of a Quality Management System?

The best way to do that is by using the ultimate transfer unit: MONEY!

The purpose of a firm is to make Money, the purpose of a QMS is to enable the firm to produce, and therefore – generate money with minimum losses that are reflected by failures.

The principles are known, but it is done?

This lecture will give the listener the basic know-how to establish a Cost of Quality mechanism to a company: Easy to gather data, easy to implement and easy support!

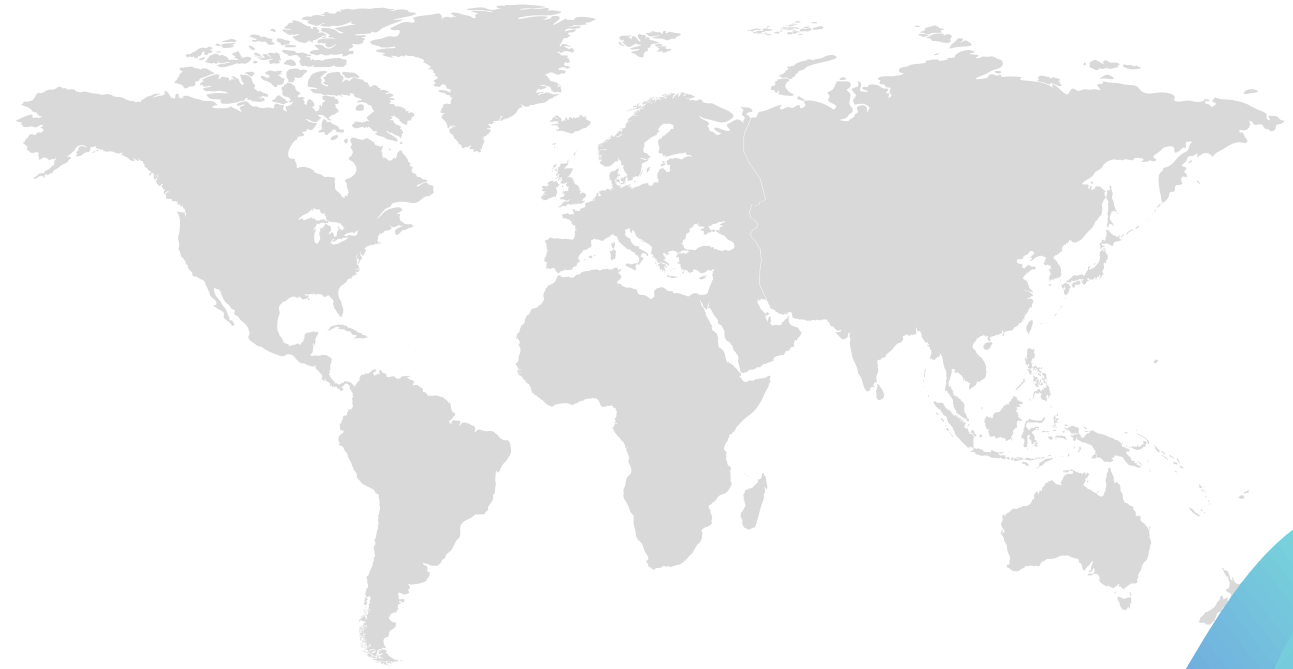

Cost of Quality is the main goal of a QMS – shows how the QMS pays itself in short term and long term.

# Who Should Attend ?

*QA/RA engineers*

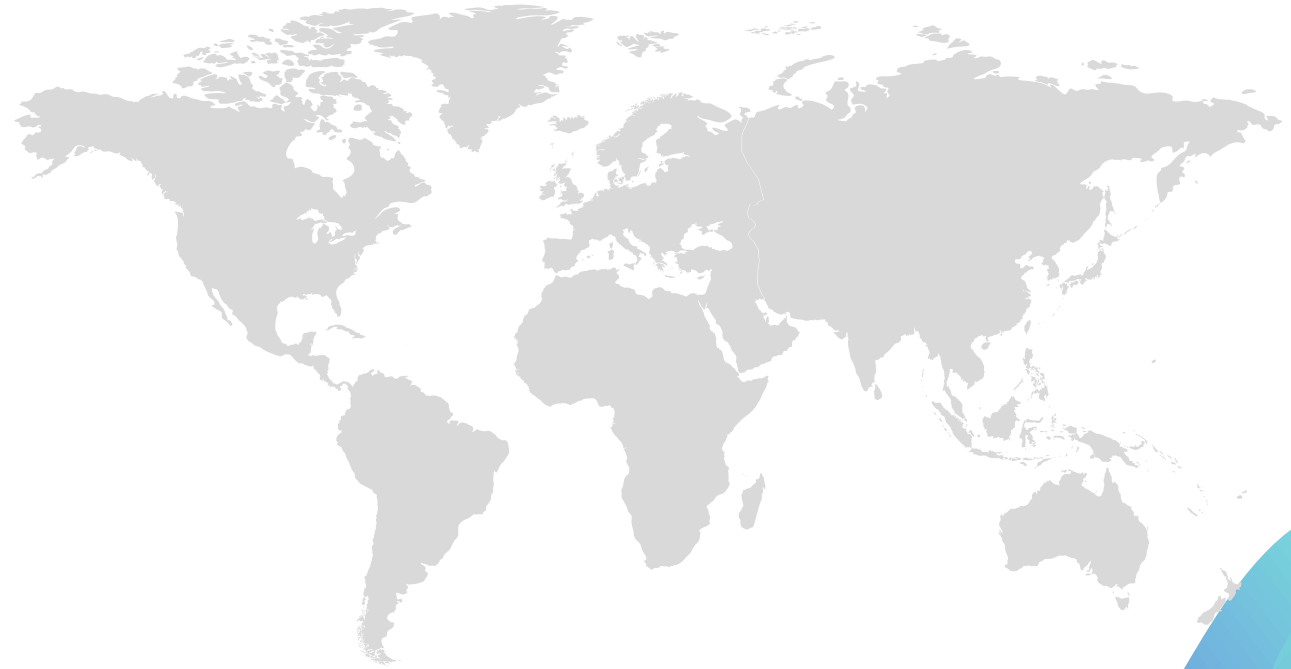

*QA/RA managers*

# Why Should Attend ?

*This webinar will discuss how to implement effectively a Cost of Quality System (Data collection, Analysis, and Metrics) using the mechanism of 6Sigma—DMAIC.*

*The presentation will address the Costs of Failure and Costs of Appraisal.*
