On-Demand Webinar

Duration : 90 Minutes

Price: \$200

# Webinar Description

This webinar will be addressing how practice/business managers (or compliance officers) need to get their HIPAA house in order before the imminent audits occur. It will also address major changes under the Omnibus Rule and any other applicable updates for 2018. Areas also covered will be texting, email, encryption, medical messaging, voice data and risk factors as they relate to IT. The primary goal is to ensure everyone is well educated on what is myth and what is reality with this law, there is so much misleading information all over regarding the do's and don'ts with HIPAA – I want to add clarity for compliance officers.

I will uncover myths versus reality as it relates to this very enigmatic law based on over 1000 risk assessments performed as well as years of experience in dealing directly with the Office of Civil Rights HIPAA auditors. I will also speak to real life litigated cases I have worked where HIPAA is being used to justify state cases of negligence – THIS IS BECOMING A HUGE RISK!. In addition, this course will cover the highest risk factors for being sued as well as being audited (these two items tend to go hand in hand).

# Who Should Attend ?

*Practice managers*

*Any business associates who work with medical practices or hospitals (i.e. billing companies, transcription companies, IT companies, answering services, home health, coders, attorneys, etc)*

*MD's and other medical professionals*

# Why Should Attend ?

*Do you have an effective HIPAA compliance program?  
New laws and funding mean an increased risk for both  
business associates and covered entities!*

*HIPAA Omnibus – Do you know what’s involved and what  
you need to do? What does Omnibus mean for covered entities  
and business associates?*

*Why should you be concerned? Court cases that are changing the  
landscape of HIPAA and patient’s ability to sue!*

**TRIAL ATTORNEYS ARE MORE DANGEROUS THAN THE FEDERAL  
GOVERNMENT!!**

*It is important to understand the new changes going on at Health and  
Human Services as it relates to the enforcement of HIPAA for both  
covered entities and business associates as it relates to what we need to  
do as compliance officers. You need to know how to avoid being low  
hanging fruit in terms of audit risk as well as being sued by individuals  
who have had their PHI wrongfully disclosed due to bad IT or internal  
administrative practices.*
