The new rule is highly anticipated by industry and will hopefully bring clarity to the long-standing GMO questions, cover financial and risk impact to businesses as well as helping consumers with educated food choices based on science, in short session encapsulates everything industry needs to know on launching the (NBFDSA).

# Who Should Attend ?

*Quality Control/Assurance and Food Safety professionals, supervisors, leads, managers*

*Operations managers/supervisors*

*Regulatory managers, supervisors or leads*

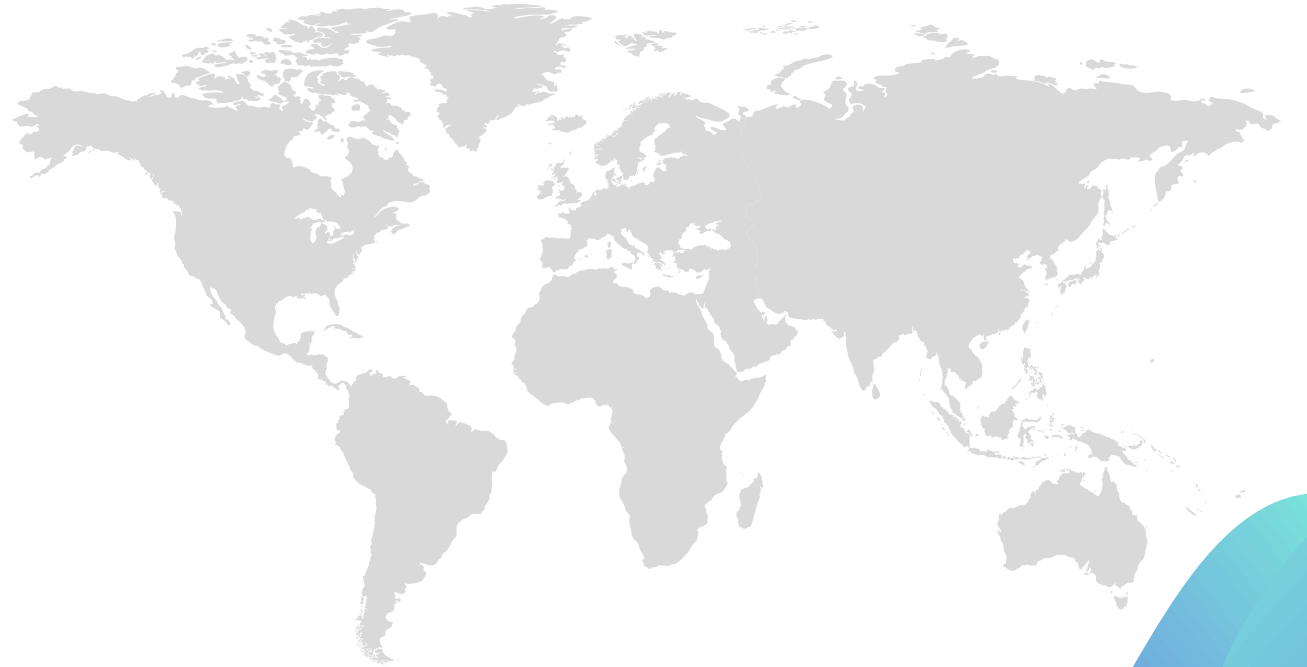

*Corporate quality managers, Regulatory Staff*

*Senior management, Validation specialists*

*Plant management personnel, Quality system auditors*

*Third parties developing HACCP/HARPC/Food Safety Plans*

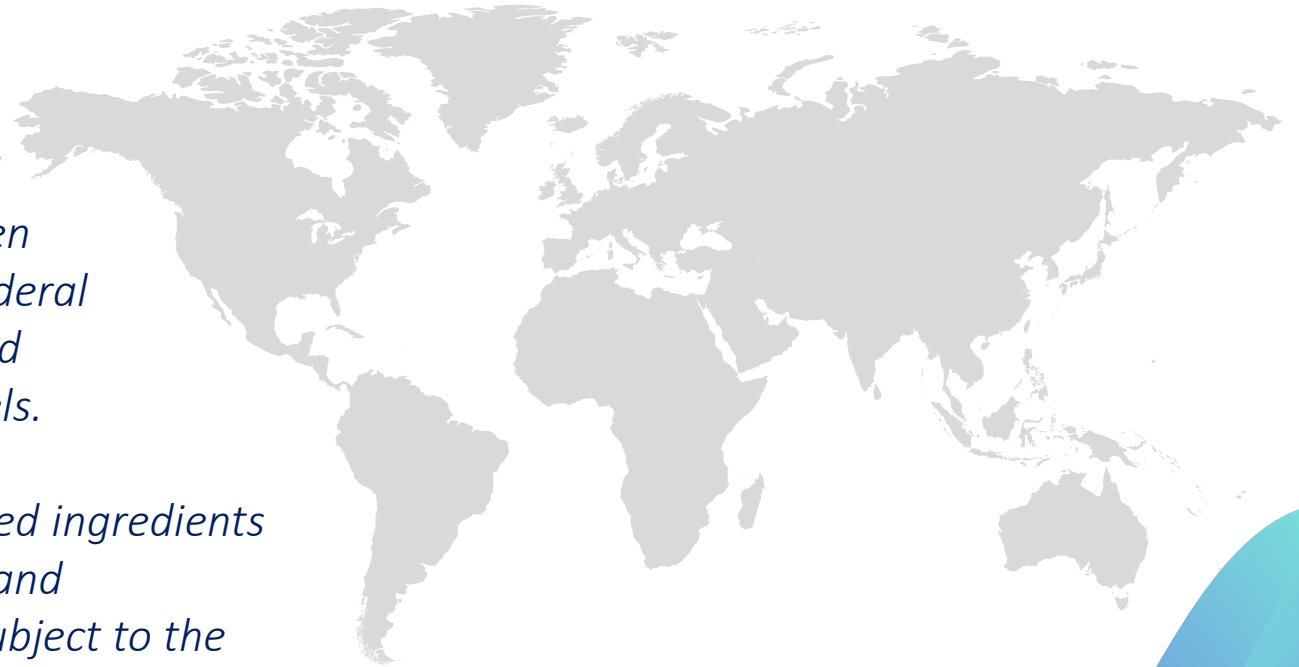

*Auditors and those with food safety inspection roles*

# Why Should Attend ?

*The long-awaited new GMO Food Labeling regulation known as the National Bioengineered Food Disclosure Standards Act (NBFDSA) has been issued by the USDA. This regulation delivers a federal standard leveling the playing field to industry and consumers often confused on GMO product labels.*

*Under this rule, all foods containing bioengineered ingredients (BE) must be disclosed and meet recordkeeping and compliance requirements. Definitions of foods subject to the ruling, exclusions, responsible parties, mandatory disclosure options, recordkeeping, and implementation dates will be covered in this session.*
