Construction projects are complex, and when things go wrong there are usually substantial damages. Learn what makes these disputes different, and get practical tips for handling construction matters.

PRESENTED BY:

Mark Henriques has litigated contract cases for 27 years and brings a practical, litigation-oriented approach to drafting and negotiating contracts. Mark is a partner with Womble Bond Dickinson, a transatlantic firm with over 1000 attorneys, where he has practiced since 1991. Mark is a skilled trial lawyer who has successfully handled and tried cases in a variety of contexts ranging from breach of contract to class actions. He has experience in state and federal court in both North and South Carolina.

On-Demand Webinar

Duration : 60 Minutes

Price: \$200

Webinar Description

Whether you are new to the construction practice or are looking for a comprehensive refresher, this course will cover multiple issues that must be taken into consideration in the realm of construction law. Join our experienced faculty as they cover a broad, basic overview of the construction process; the fundamentals of construction contracts and key provisions; the basics of insurance; and the impact changes and delays can have on a construction project. Don't miss this opportunity to build your skills in construction law

- Learn the roles of all parties involved in the construction process
- Discuss the critical elements that need to be included in comprehensive construction contracts
- Discuss how mechanic's liens work and how to properly file a lien
- Walk through the fundamentals of insurance and its importance in the construction
- Learn how delays can impact a construction project and how to work through them if they arise
- Run through the claims process in construction cases
