# Webinar Description

This webinar will review the basic tenants of Information Governance. We will then bring these theories to a practical level by discussing strategies for maintaining documents and information in today's electronic work. We will discuss the key components of a good document retention policy. Finally, we will discuss the importance of litigation holds, including how, why and when to implement them to avoid legal sanctions and reduce the cost of litigation.

# Who Should Attend ?

*In-house Counsel*

*General Counsel*

*Information Governance Professionals*

*Data Managers*

# Why Should You Attend ?

*Companies live and die by their data. An effective data management program is critical to managing and finding the documents you need, and getting rid of those you don't.*
