

Webinar on

5-S: Industrial Cleaning and Organization

Learning Objectives

- Gain an understanding of 5S importance and effectiveness*
- Develop workplace organization skills*
- Learn the benefits of “Visual Factory”*
- Be able to implement and sustain 5S projects*

Areas Covered

- What are the 5S principles?*
- Why should we do 5S?*
- 5S as a “Sonar System”*
- Scoreboard Principle*
- 30-second rule*
- Where should it be implemented?*
- Who should do it?*
- How does it get done?*
- Pre-Activities*
- Activities*
- Post-Activities*

5S has been defined as “A place for everything and everything in its place.”

PRESENTED BY:

Hormoz Mogarei - has been in management since 1990, with 20 years of those, directly in the “Lean” environment with Toyota and Toyota subsidiaries. In addition to many Lean Manufacturing courses, Hormoz has also authored and presented quite a few Management workshops such as: “Project Management, Effective Communication skills, Time Management, Strategic Planning, (Hoshin Kanri), Quality Improvement initiatives, Scientific Problem-solving, Standardization, Effective Leadership / Followership, and Team Building”. Mr. Mogarei was first trained on Lean Manufacturing Techniques by Toyota Supplier Support Center (TSSC) in Kentucky as well as in Nagoya & in Toyota-City, in Japan.

On-Demand Webinar

Duration : 60 Minutes

Price: \$200

Webinar Description

5S has been defined as “A place for everything and everything in its place”.

It is a workplace (mostly industrial) organization method that uses a list of five Japanese words: seiri (Sort), seiton (Set-in-Order), seisō (Shine), seiketsu (Standardize), and shitsuke (Sustain).

The course describes how to clean and organize a workspace/workstation for efficiency and effectiveness. The rule of thumb is that after a place is 5S'd, the 30-sec principle will prevail. The 30-sec principle suggests that anything that one is looking for within the work environment, should be able to be retrieved in 30-seconds or less. This will be done by having a place for everything, identifying and storing the items used, clearly labeling each area, maintaining the area and items, and sustaining the new order. All these will become possible if the processes at work are Standardized.

This is one of the concepts in TPS (Toyota Production System) that allows the organization to be able to observe the 30-sec rule that says; anything you are looking for either within the shop floor (Gemba) or in the offices, you should be able to do so in 30 seconds!

Who Should Attend ?

Production Managers
Plant Managers
Manufacturing

Why Should You Attend ?

If your company's Safety performance is not what your people deserve

If your quality is jeopardized and is sporadic

If lack of organization inhibits your growth and expansion in today

If you organize but a short time later, it's back to where it was. If sustainability seems to be the issue

If you want to be the Showcase Supplier but you are hesitant to invite your customers over, since your place is not at its tip-top shape

If you are wondering why your company culture isn't attracting anymore

If you don't feel good inviting visitors, prospects, and customers over
