# **Create a Dashboard with Excel**

# Learning Objectives

- Creating and managing Pivot Tables*
- Adding A pivot chart*
- Adding Slicers*
- Adding timelines*
- Adding a KPI*

In this webinar,  
you will learn  
how to make all  
of your raw data  
and quickly turn  
that data into  
easy to use  
flexible  
summary  
reports using  
Pivot Tables and  
Charts.

**PRESENTED BY:**

*Tom Fragale is a computer professional with over 30 years of professional experience. He has trained over 30,000 business people in on-line webinars, public seminars, and on-site training. His clients include many Fortune 500 companies, government agencies, military bases, and companies large and small across many industries, including manufacturing, banking, pharmaceutical, education, retail, etc.*

On-Demand Webinar

Duration : 60 Minutes

Price: \$200

# Webinar Description

In this webinar, you will learn how to make all of your raw data and quickly turn that data into easy to use flexible summary reports using Pivot Tables and Charts. We will start with the basics and built up to more complex pivot tables. Many people struggle with how to create Pivot Tables, or maybe they don't even know what they can do, or maybe they think they are too difficult. I'm going to show you what they, how to use them, and that they are not difficult, and they can give you tremendous results. We will then make Pivot Charts, to graphically show the data. Then, we will add sorts, filters, slicers, and timelines to create a very easy-to-use, but very powerful dashboard that can give you instant results, and allow you to slice and dice your data any which way. You and your staff will be instantly more productive in Excel. We will also add a new feature called a KPI, which gives you a new way to visually display the data. These techniques will work cross-industry, with any type of data. You will find it to be clear and concise and right to the point, and you will be able to apply these techniques to your own data immediately after the session.

# Who Should Attend ?

*Business owners*

*CEO's / CFO's / CTO's*

*Managers of all levels*

*Anybody who uses Excel on a regular basis, and  
want to be more efficient and productive*

*Administrators*

*Salespeople*

*Trainers*

*Bankers*

# Why Should You Attend ?

*In today's busy world, everybody wants quick results. Plus, people don't have time to look at tons of data. They want a visual summary of the data. Excel dashboards will allow you to change the criteria of the data very quickly, and then see the reports right away in a visually pleasing format.*
