Webinar Description

In the business world, or within your organization, you probably experience large amounts of data. Maybe the data is about your sales, customers, donations, orders, employees, vendors, expenses, or whatever it may be.

Excel has many built-in functions that help you deal with that data. It is very important that you know how to use some of these functions to get the most out of your data in a time efficient manner. This way, you can turn the data into meaningful information and then provide the answers that you need for yourself, your boss, your company or your organization. If you handle large amounts of data in Excel, this webinar will help you tremendously.

In this webinar, you will learn how to use some of the most popular functions in Excel. This includes : Relative formulas, Absolute Formulas, IF, And, Or, Vlookup, Hlookup, Match/Index, Sumif, Countif, Averageif, Sumifs, Countifs, PMT, Networkdays.

Who Should Attend ?
